

AMAZING ART

Designed by Montana

In this amazing year of 2019 we have had 3 terms to achieve art goals. We have also been working very hard in the effort that we put into our art work to present to our families by the end of this year. We have completed art work such as serialism, one point perspective, abstract art, stain glass art, observational drawing, wire sculpture, weaving, print making, self portraits and a wide variety of art work. Everything has been designed by Maldon Primary School students with some help from our amazing art teacher, Kathryn.

In Term three all students created a piece of art work to celebrate our home, Australia. Our art work was fantastic that a local shop called Portia & Co decided to host an art exhibition showcasing the local talent of Maldon Primary School. Each class made a different type of artwork. The prep/1s made little echidnas made from clay and natural materials from outside. The 2/3 students made portraits of Australian animals by using photos of the animals face, then they drew bodies using different patterns. The grade 3/4s created observational drawings of leaves or photos of native plants. The grade 5/6 class did paintings on a block of wood using Aboriginal symbols to tell a story that has happened in their own lives. Someone visiting Maldon said: "I was delighted to view your artwork in one of the local shops when we visited your town. What a great way to have your own gallery. Keep up the good work!

Chloe: "I think the best art work that I created this year was my wire sculpture."

Piper: "My favourite art work would be my obligational drawing."

Eve: "This year I loved doing weaving in art."

Lelu: "Print stamping."

Elsa: "I liked drawing chickens."

Maddie; "I liked the Aboriginal story board best because it shows the way they tell their stories."
