

clubs

By Rex and Jack

In term 4 this year all students have participated in two clubs activities. Clubs is held each Wednesday afternoon in mixed groups based on student interests. The first options for clubs were Coding, Cooking, Circus and building a Fairy Garden. Later we added a Craft club to replace Circus. Each of the teachers ran a club and we were very lucky to have Nick Layne volunteer to help create our magical Fairy Garden.

Coding—The Coding group did the Hour of Code on code.org. On code.org they had the options to create computer games like Flappy Bird, Minecraft, and Dance Party. Dance Party seemed to be a popular choice.

Cooking—The Cooking group made and ate choc chip cookies, cupcakes, chocolate brownies and delicious scones. Some of the delicious treats were sold at the school market day cake stall. Danica said the chocolate brownies seemed to be the most popular recipe.

Circus/Craft —The Circus group made some awesome juggling balls with rice and balloons and they had lots of fun. They are now practising juggling and they learned to use the roller bowlers, diablo and spinning plates. The Craft group replaced circus and they made some origami bookmarks and made some Christmas decorations.

Fairy Garden—The Fairy Garden group designed and constructed a beautiful fairy garden made out of wood and plants. it is looking spectacular. They have built and painted little houses. They made little butterflies and put them on trees.

After five weeks, students could switch clubs activities
